You are welcome to begin working on your online application as soon as it is unlocked; you will receive an email notice that it is unlocked at least 6 months in advance of the application due date. However, we require that the responses in your application be no older than 90 days prior to submission so plan to review your responses and attachments prior to submitting your application to ensure it includes the most up-to-date information.

All material submitted to the Commission must be submitted electronically using the online application system. Make sure to plan ahead to ensure that your land trust has all the information needed to ensure the application can be submitted electronically by the application due date.

TIP: Previous applicants found it helpful to review the application questionnaire and list of attachments in advance of logging onto the system. Click here for a reference copy of the application questionnaire and required documents.

TIP: The application fee is also due on the application due date. It is invoiced separately. See the current accreditation fee schedule for details.

- Application Questionnaire
- Application Documentation
- Project and Targeted Verification Documentation

**Application Questionnaire**

Your responses to the application questionnaire determine the list of supporting documentation that will be required from your organization. Accreditation involves a mix of required documents and sampled documents to confirm that the land trust is following Land Trust Standards and Practices and meets the accreditation requirements. Some documents are required from all applicants (such as policies); some documents are required depending on a land trust’s application responses (see example, below); and some documents are sampled as requested by the Commission (such as a documentation related to management of a recent conflict, or project documentation).

**Application Documentation**

The application requires written statements as attachments, generally for detailed narrative responses. You may have written materials (such as policies, procedures, checklists, etc.) that answer the question; these may be included in support of your statement. If the written materials fully describe your response, you can provide those in lieu of a separate statement.

**How Detailed an Answer?**

Your statements and answers to the questions in the application should be clear and candid. You should do what you can to help a reader who does not know about your organization understand the work you are doing. Do not be concerned about getting the “right” answer. The Commission recognizes that there is a diversity of approaches in how each land trust implements the accreditation indicators. The key is that they are being implemented and you can show us how it is done in your land trust.

**Changed Practices**

A land trust may have substantially changed its practices in the last few years. If this is the case, you may want to note when substantial changes were made so that reviewers can understand differences between application answers and project documentation. It helps to be candid; if you have past projects that would not be done the same way today, explain what would be different.

**New Policies**

If your organization recently adopted new policies, your application must include evidence that the policies are being implemented. You may either provide documentation that your practices were in place before being formalized in a policy or show documentation of how the new policy is implemented.

**Project and Targeted Verification Documentation**

**Complete Project Documentation**

The Commission selects specific conservation easements or fee properties listed on the Land Conservation Project List provided in your pre-application. Your land trust then provides a complete set of documentation for that project. The number of complete projects selected depends on how many projects in each category are conservation easements or fee properties
your organization holds at time of pre-application. We will cap the number of projects we select at six, unless there is an extraordinary circumstance, and select the number of projects as follows. For each category of holding (conservation easement and/or fee ownership):

- 1–25 holdings = up to 2 project files in this category
- 26–50 holdings = up to 3 project files in this category
- 51–100 holdings = up to 4 project files in this category
- 101–200 holdings = up to 5 project files in this category
- >200 holdings = number determined on a case-by-case basis

The Commission has created a project documentation list that contains the potentially-required documentation for any type of conservation project (easement, fee, purchase, donation, mitigation, etc.). This list can be found here (see “Targeted Verification Item Checklists”). To compile your project documentation, review the list and identify the documents on the checklist that you have for the project selected by the Commission. Once you have identified the list of documents that are available for the project, compile the documentation and upload them to the online application system as prompted.

**Targeted Verification Documentation**

Targeted verification includes a narrow set of documents to show how the land trust met the requirements in a specific area. Based on your land trust’s pre-application answers and documentation, the Commission may request specific documents be uploaded for transactions or activities identified as being higher risk (i.e., a routine conservation easement amendment to add acreage would not be selected for additional documentation, but an amendment to add a building envelope likely would). The list of documents that could be requested for each type of targeted verification item can be found here (see “Targeted Verification Item Checklists”).
